

Size Standards: Rectangular Shades

BRILLIANCE® PLEATED SHADES

HOW TO USE THE SIZE STANDARDS CHART

The Size Standards chart is designed to be a quick reference to size standards, price charts and where to find further product specifications. Price charts are referenced by chart number next to the fabric style(s) and further product specifications are referenced by page number under the application. Always read the notes under the chart for important additional information. Important: shade dimensions must be equal to or less than the maximum dimensions (width, height and area) and equal to or greater than the minimum dimensions (width and height) to be within specification guidelines.
