3 Louver Size

Specify louver size: 2 1/2", 3 1/2" or 4 1/2"

4 IM or OM

Specify inside mount or outside mount.

IM = Inside Mount

Factory takes a standard framed deduction of 1/4" from width and height or a standard without frame deduction of 3/16" from width and height.

On all inside mounts, diagonal measurements must be taken. If diagonal measurements are not equal, consider making greater deductions than the standard 1/4" (framed) or 3/16" (without frame). If the diagonal measurement difference is greater than 1/2", we recommend an outside mount for that particular window opening.

OM = Outside Mount

Factory takes no deductions. Submitted size will be the finished shutter size.

When measuring the opening of a typical window for outside mounts, we recommend adding the width of the base of the frame plus 1/4", per framed side, to the largest width and height measurements.

This provides a 1/4" reveal around the entire window opening.

Standard additions:

Frame Type	3-Sided Frame		4-Sided Frame	
	Width	Height	Width	Height
S21, L21	3 1/8"	1 9/16"	3 1/8"	3 1/8"
